

JUMP

Certification Manager
New York, NY or San Francisco, CA

About JUMP

[JUMP](#) (by Social Bicycles) is building the future of urban mobility: shared electric bikes that are the quickest, most enjoyable, and most empowering way to get around a city. Cheaper than most public transit and faster than cars in traffic, JUMP e-bikes are game-changers for local transportation. In addition to the 30+ Social Bicycles systems in operation, JUMP currently has systems in the San Francisco Bay Area and Washington DC, with plans to expand to at least 10 major US cities in the next year. Our goal is to transform cities, making them more sustainable, equitable, and livable through electric mobility.

To make this vision a reality, we need to grow our team. We place tremendous value on our company's roots and culture: a mix of ingenuity, controlled chaos, hard work, and sense of purpose. This is a great opportunity to join a rapidly growing team that is shaping the future of transportation.

About the Role

We are currently seeking a Certification Manager to assist in the development of our next-generation of electric bikesharing products. IoT devices, electric drivetrains, and outdoor charging stations are a crucial piece of our product offering, and the regulatory environment around them is evolving quickly. We need to grow our product team so that we can efficiently ensure our products are safe and certifiable - and in doing so, take a leadership position in defining the standards of this new industry.

Responsibilities

- Review our product categories and operating markets, using this information to research necessary certifications and testing procedures for entering and operating in those markets;
- work with test labs to move projects through initial, final, and recurring certification scopes;
- work with manufacturing partners to ensure that products are being developed to meet the necessary certifications, and tested informally during the development process in a way that prepares for eventual independent certification;
- manage the controlled introduction of new products, establish testing plans, organize pilot production runs, and implement quality standards which ensure that large-volume production runs maintain certification criteria.

Experience and Skills

- Obsessive attention to detail;
- 5+ years working with certification agencies to bring products to market and/or deploy equipment installations;
- familiarity with industry standards bodies covering mechanical and electrical scopes, such as UL, CE, PTCRB, FCC, EN;
- demonstrated self-motivation and good judgement for moving forward projects to achieve compliance with complex or in-development standards;
- relentless instincts to follow-up with internal and external partners to keep projects on schedule.

Job Type: Full Time

Compensation: Commensurate with experience

Please submit your resume and cover letter to jobs@jumpmobility.com

Equal Opportunity Employer

It is the policy of Social Bicycles (SoBi) to provide employment opportunities without regard to race, color, religion, creed, ethnicity, national origin, alienage, citizenship status, age, marital status, partnership status, disability, sexual orientation, gender (sex), military status, prior record of arrest or conviction (except as permitted by law), predisposing genetic characteristics, or status as a victim of domestic violence, sexual offenses and stalking, and to maintain an environment free of harassment on any of the above-noted grounds, including sexual harassment or retaliation. SoBi strongly encourages diverse candidates to apply.
